

Fig. 1A

Fig. 1B

Figure 1 is a line graph showing the cumulative release of paclitaxel (%) over 10 days for four different concentrations: 0.10%, 1%, 5%, and 10%. The y-axis is labeled "Paclitaxel Released, %" and ranges from 0 to 100. The x-axis is labeled "Release Time, day" and ranges from 0 to 10. The legend indicates that the 0.10% concentration is represented by squares, 1% by triangles, 5% by diamonds, and 10% by circles. All concentrations show an increase in release over time, with the 0.10% concentration showing the highest release rate and the 10% concentration showing the lowest. Error bars are present for all data points.

Release Time, day	0.10% (squares)	1% (triangles)	5% (diamonds)	10% (circles)
0	0	0	0	0
1	33	29	14	8
2	57	52	20	12
3	80	70	25	15
4	85	78	31	18
5	90	80	37	22
6	90	80	45	28
7	-	-	49	30
8	-	-	52	31
9	-	-	57	35
10	-	-	60	39
